

Portfolio Development Process – First Submission Report

Karim Massaoud

2/3/2025

Page 1: Home Page

Purpose:

This is the first page people will see. It introduces who I am and what I do. It should give a quick overview of me as a web developer.

What's on the page:

My name and job title (Karim Massaoud – Web Developer)

A short introduction about me

Buttons to view my CV and portfolio

Social media icons (Instagram, LinkedIn, etc.)

Connected Learning Outcome:

LO5: Personal Leadership – I show who I am and how I want to present myself.

Page 2: About Page

Purpose:

This page gives more information about me, my background, and my skills. It helps people understand my experience and what I can do.

What's on the page:

A short story about me

My career goals

My technical skills (like HTML, CSS, JavaScript, and Figma)

My personal skills (like teamwork and problem-solving)

Languages I speak

Connected Learning Outcomes:

LO1: Interactive Media Products – This is part of the interactive product (my website).

LO5: Personal Leadership – I share my personal story and show what I've learned.

Page 3: Projects / Portfolio Page

Purpose:

This page shows the work I've done. It's where I display my best projects so people can see what I'm capable of.

What's on the page:

Project cards (each card has a project image, title, short description, and a button to view more)

A section for design templates I've made (optional)

Connected Learning Outcomes:

LO1: Interactive Media Products – This page displays digital products I created.

LO3: Iterative Design – I can show how these projects improved after feedback.

Page 4: Resume / Experience Page

Purpose:

This page shows my work experience, education, and the services I offer. It helps people see my journey and what I can do for them.

What's on the page:

Timeline of my work experience

My responsibilities in each job

Skills and tools I use

Services I offer (web design, WordPress websites, etc.)

My hobbies and interests

Connected Learning Outcomes:

LO4: Professional Standard – This page is presented professionally and clearly.

LO2: Development & Version Control – This page will be built using proper coding and version control techniques.

Page 5: Feedback & Iteration Page (Optional but Recommended)

Purpose:

This page tracks the feedback I received from teachers and classmates and shows how I used it to improve my work.

What's on the page:

Feedback I received from my teachers and classmates

Screenshots or examples of my work before and after changes

A short reflection on what I learned

Connected Learning Outcomes:

LO3: Iterative Design – This page shows how my work improved through feedback.

LO5: Personal Leadership – It shows I take feedback seriously and use it to grow.

Page 6: Technical Documentation Page (Optional).

Purpose:

This page explains how I built my portfolio, what tools I used, and how I kept track of changes.

What's on the page:

List of tools (like Figma, Visual Studio Code, and GitHub)

Screenshots showing how I used Git (commits and version history)

A short explanation of problems I faced and how I solved them

Connected Learning Outcome:

LO2: Development & Version Control – This page shows I understand how to use professional tools and version control systems.

Here below is the design that i started creating it:

<https://www.figma.com/design/m2MQXuBjegGLu1zSw1ikRN/Portifolio?node-id=0-1&p=f&t=p1KxBO3up0v9EkCm-0>

Why I Chose This Design

Dark Theme – It gives a modern and professional look.

Red and White Highlights – These colours create good contrast, making important content easy to read.

Simple Navigation – The navigation bar is always at the top, so visitors can easily move between pages.

Clear Layout – I used boxes and sections to organize content, so everything is easy to find.

How This Fits the Learning Outcomes

LO1: Interactive Media Products – My portfolio is an interactive website that shows my design and development skills.

LO3: Iterative Design – I started with some ideas and sketches, then improved the design based on feedback.

LO4: Professional Standard – I made sure the design looks clean, professional, and easy to use.

LO5: Personal Leadership – I made design choices that match my personality and style, showing who I am.

This is just the first version of my design, and I will keep improving it after getting more feedback from my teachers and classmates.
